Spot

Academia & Innovation Kit
The next generation of mobility, sensing, and manipulation. Spot’s features serve research efforts across a wide range of industries - from construction to manufacturing, energy & utilities, oil & gas, and more.

**Agile**
Explore unstructured terrain with unprecedented mobility, going where wheeled robots and drones cannot. Spot cruises over loose gravel, grass, curbs, and stairs by automatically engaging gaits designed to optimize stability.

**Customizable**
Spot’s open platform for sensing and manipulation offers the flexibility you need for research and education. With out-of-the-box functionality, Spot can handle its own mobility, autonomy, and navigation while you augment the robot in the area of innovation most interesting to you.

**Intuitive**
Whether you’re putting Spot to use out of the box with its easy-to-learn tablet controller, or developing a custom application with Spot’s API, we have the resources to support you. Get started with Spot in under an hour, with comprehensive support and training offerings to help you scale.
**Autonomy**

Spot comes with Autowalk, a feature that allows users to record and replay autonomous missions that can include actions such as data collection and API callbacks. For even more sophisticated autonomy solutions, developers have access to the broader autonomous navigation API that Autowalk is built on.

**Manipulation**

The Spot Arm allows the robot to interact with the world around it. Through the intuitive tablet interface or the API, users can choose from manual, semi-automated, or fully automated arm actions, such as maneuvering or inspecting objects with the gripper, and even turning valves, flipping levers, and opening doors.

**Data Collection & Analysis**

Spot’s cameras and any attached sensors collect data that can be processed on-robot through the Spot CORE I/O or sent off-robot to be processed elsewhere. Integrate third-party computer vision models, enterprise asset management (EAM) systems, and more.
KIT INCLUDES:

SPOT ARM

SPOT ROBOT

SPOT CORE I/O

SPOT CARE
**SPOT ARM**

Equipped to operate through both semi-autonomous actions and telemanipulation, the arm will open doors, pick, place, push, or drag objects, and adapt to new situations at the push of a button or swipe of a screen.

**Features:**
- 6 degrees of freedom plus a gripper
- Semi-automated manipulation options
- Carries up to 11kg (24 lbs)

**SPOT CORE I/O**

Spot CORE I/O enhances both the computation and communications available on the Spot platform. Easily configure inputs such as sensors, cameras, and other devices to Spot and process data collected into actionable insights.

**Features:**
- Compact CPU and GPU with customizable inputs and outputs
- 5, 12, and 24V regulated power output
- RJ45 standard ethernet adapter
- Built-in 5G/LTE modem with CBRS support for private networks

**SPOT CARE**

One year of premium service and support to keep your robot up and running at peak performance.

**Features:**
- Free damage protection*
- Part replacement
- Quick repair turnaround

*Improper use of Spot is not covered under Spot CARE. See our [Spot CARE Terms and Conditions](#) to see what constitutes improper use.

### TERRAIN SENSING
- **Horizontal Field of View**: 360°
- **Range**: 4 m (13 ft)
- **Lighting**: > 2 Lux
- **Collision avoidance**: Maintains set distance from stationary obstacles

### CONNECTIVITY
- **WiFi**: 2.4GHz / 5GHz b/g/n Ethernet
- **Environment**: Ingress Protection IP54
- **Operating Temp.**: -20°C to 45°C
### TABLET WITH JOYSTICKS

### SAFETY AND COMPLIANCE, UNITED STATES

Designed according to ISO 12100 for risk assessment and reduction methodology and IEC 60204-1 for electrical safety. See [Information for Use](#) for further details on intended uses.

Emergency Stop meets ISO 13850

**EMC: FCC Part 15B**

Radio equipment: Incorporates a FCC Part 68 Certified radio system

**LASER PRODUCT**

Class 1 eye-safe per IEC 60825-1:2007 & 2014

### SPOT ARM

**DEGREES OF FREEDOM**

6 + gripper

**LENGTH**

(at full extension) 984 mm (38.7 in)

**MAX. ENDPOINT SPEED**

10 m/s

**MAX. LIFT CAPACITY**

Up to 11 kg (24.3 lbs)

**CONTINUOUS LIFT CAPACITY**

(at 0.5 m extension) 5 kg (11 lbs)

### SPOT CORE I/O

PROCESSING

(JETSON XAVIER NX)

**CPU**

6-core NVIDIA Carmel ARM V8.2 64-bit CPU with 6MB Lw + 4MB L3 cache

**GPU**

384-core NVIDIA Volta GPU with 48 Tensor cores

**MEMORY**

16GB 128-bit LPDDR4x at 51.2 GB/s

### CONNECTIVITY AND STORAGE

**5G/LTE**

User-installable SIM card. AT&T is the supported 5G provider in the United States; however, customers also have the option of utilizing their own private 5G network. For international customers, users must obtain their own SIM from a local carrier for which there may be additional network restrictions.

**ETHERNET**

GbE interface, unmanaged 2 port Ethernet switch for additional connectivity

**STORAGE**

512GB SSD‡

**USB 3.1**

2x USB 3.1 ports with support for 4.5W

**USB-C**

1x USB-C port with support for 50W power delivery and video out

**SD CARD**

1x SD card slot

### SECURITY

**DISK ENCRYPTION**

SSD encrypted with standard LUKS technology

**NETWORK ENCRYPTION**

Connections encrypted with TLS 1.2 and 1.3

**AUTHENTICATION**

Access to services restricted to authenticated users

**SECURE BOOT**

Tamper-proof filesystem with hardware root of trust

**FIRMWARE VERIFICATION**

Firmware updates must be cryptographically signed

---

‡ Actual storage available will be less due to operating system.
